Personal Interests:

My main hobbies are art, painting in all media and reading, mainly poetry. I am a member of the Maidenhead Painting Club and a friend of the Stanley Spencer Art Gallery. I enjoy snorkelling and the odd game of golf but not while snorkelling! I am a keen gardener and I love to visit gardens, both here and overseas.

Research:

E Bermingham, J L Henshall and R M Hooper, ‘The Influence of Cutting Fluid Composition on the Wear of High Speed Steel Tools in Intermittent Cutting’, First World Tribology Congress, London, 8-12 September 1997, Abstracts of Papers, Mechanical Engineering Publications, p 599

I also undertook research into the effects of ‘problem drinking in industry’ and designed and built a machine to test the reliability of AC motors.

Professional Activities:

Current

I am an active committee member of the Mid Thames Branch of the Chartered Management Institute, currently serving as Branch Treasurer.

Previous

Education Officer and Chairman of the Chartered Management Institute, Mid Thames Branch
